me: how did you get on freenode, did clicking the link with your browser open work?
Clark: no, you have to have or download IRC soft ware
me: I've got that
Clark: start with that
me: got icechat
me: not sure how to go to freenode though
Clark: #project pm is open, i think you can just open your iRC and go to the channel
me: I think it has to connect to a server first
me: which I guess is freenode
Clark: what the name you have in ice chat
me: none yet
Clark: i think maybe your IRC program finds the server
me: looking for info, might get different client
me: okay, got on
